

Peak Oil Films

1. Peak Oil: Imposed by Nature
2. The Power of Community: How Cuba Survived Peak Oil

Friday, April 7

at the SLO Library, 7pm

\$5 suggested donation.

These films will be screened on a large screen!

total running time of both films: 80min.

The first film focuses on the work of Colin Campbell, a geologist and founder of the ASPO (Association for the Study of Peak Oil)

The goals of the second film is to give hope to the developed world as it wakes up to the consequences of being hooked on oil, and to lift American's prejudice of Cuba by showing the Cuban people as they are. The filmmakers do this by having the people tell their story on film. It's a story of their dedication to independence and triumph over adversity, and a story of cooperation and hope. Several Cubans expressed the belief that living on an island, with its natural boundaries, breeds awareness that there are limits to natural resources.
